

Planning for Tomorrow

What is the 2050 RTP?

The Regional Transportation Plan (RTP) identifies our region's long-term transportation policy and transportation projects.

The RTP is based on past performance and public opinion.

The RTP is undergoing an extensive public involvement process to refine its content. It is set for Council adoption in March.

Only projects found in the RTP are eligible for federal funding.

Its policy section is comprised of: Goals, Objectives, Actions, and Performance Measures.

The projects in the RTP must be financially reasonable and meet air quality standards.

It's a "living plan," subject to continual revision — at least every four years!
