

# **Comparison of MOBILE6.2 and MOVES Emissions**

## **Annual Emissions in Tons/Year**

### **Key Assumptions:**

**Travel Demand Modeling: Based on Peninsula Model as of July, 2011.**

**Network & TAZ Data:** WILMAPCO: July, 2010

Dover/Kent MPO: Summer, 2009

Sussex County: Winter 2009.

**CUBE Voyager:** Version 5.1.3 (March 2011).

### **Emissions Modeling:**

**MOBILE 6.2:** Based on Input Files for Above Conformity Determinations.

**MOVES:** Based on DNREC Input Files & Excel Spreadsheet Process.

**October 13, 2011**

## Comparison of MOBILE 6.2 & MOVES for Delaware (“Where Are We Today ?”):

### Mobile Source Emissions Model Development Process:

#### ***December, 2010 – March, 2011:***

- 1) Generate VMT & VHT Speed Bin Collation Process in CUBE Voyager to Support DNREC SIP Work (2008 & 2009).

#### ***April – August, 2011:***

- 1) Input **DNREC “MOVES Process”** into DelDOT/MPO Peninsula Travel Model (CUBE Voyager 5.1.3).
- 2) Generate Annual Emissions.
- 3) QA/QC Among WRA/DelDOT/DNREC as to Process Inputs & Outputs.

#### ***August – September, 2011:***

- 1) Refine & Adapt CUBE/MOVES Process Daily Emissions.
- 2) Generate Daily Emissions.
- 3) QA/QC Among WRA/DelDOT/DNREC as to Process Inputs & Outputs.

#### ***October, 2011:***

- 1) Refine Process, Continue QA/QC.
- 2) Review Sussex County Emissions Results.

# Comparison of MOBILE 6.2 & MOVES for Delaware:

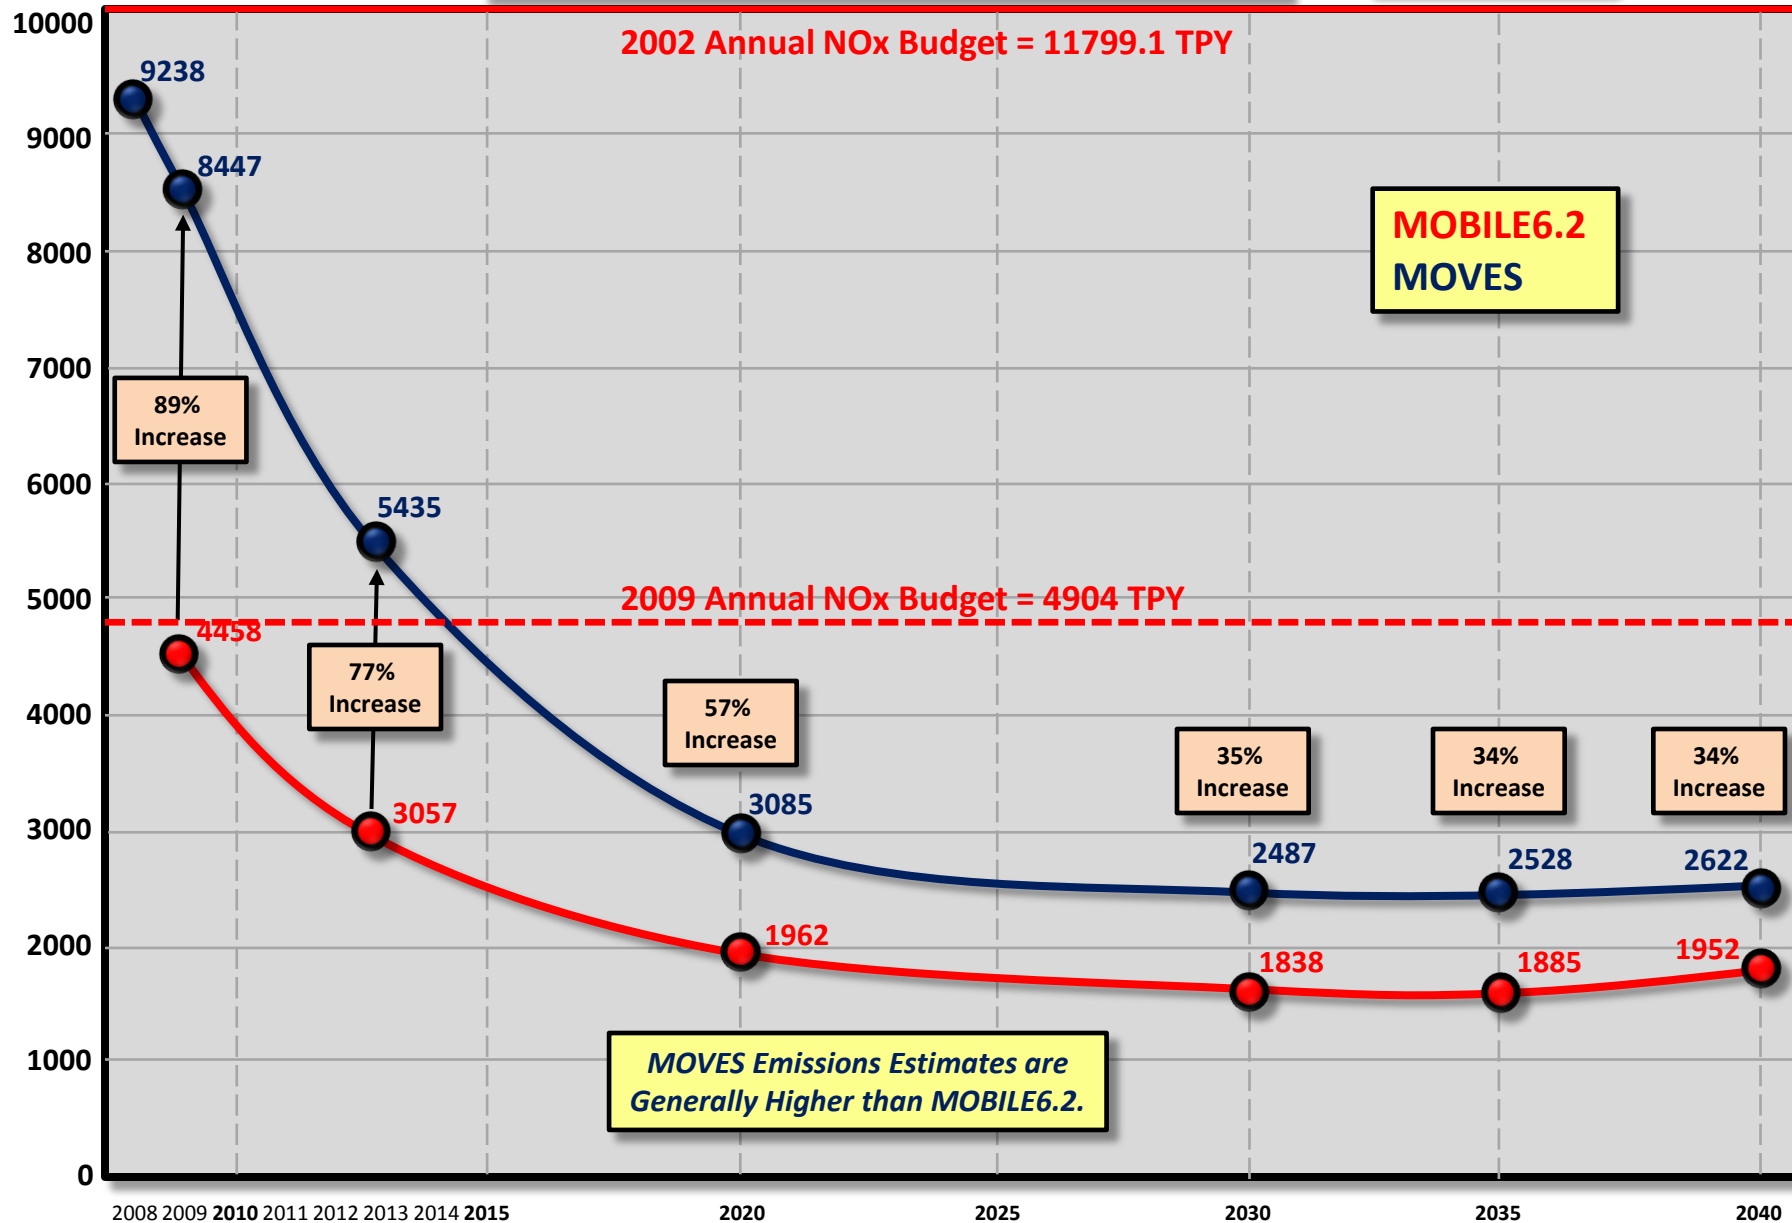

## Quick Review of Emissions Software:

	<u>MOBILE 6.2</u>	<u>MOVES</u>
<b>Author:</b>	EPA	EPA
<b>Release Date:</b>	July, 2001	March 12, 2010
<b>Previous Version:</b>	MOBILE 5a/5b	MOBILE 6.2
<b>Main Output:</b>	Emission Factors (Specific & Composite) for 1 mph Increment Speeds.	Emission Factors for 16 Speed Bins. (VHT Based on VMT Allocation to Bins).
<b>Output Form:</b>	Only Emission Rates	Emission Rate & Inventory Possible.
<b>User Data:</b>	Limited User-Provided Data	Able to Accommodate State Data
<b>GUI:</b>	No: User-Specified ASCII File	Yes: Has GUI
<b>Geographic Scale:</b>	County & Nation	Project, County, Multi-County, Nation
<b>Data Analysis</b>	Pre-1994 Vehicle Fleet	Larger data set (Pre-1999 Fleet?)
<b>Travel Model Input:</b>	VMT Based Speed Distribution	VHT Based Speed Distribution
<b>Particulates:</b>	PM data with No Temperature Effects	PM data with LDV & Temp. Effects
<b>Heavy Vehicles:</b>	HDV without Speed Effects, No Crankcase, Start or Extended Idle Emissions.	HDV with Speed Effects and Other Processes.
