The *Cecil County Bicycle Plan* seeks to improve quality of life for residents and visitors by expanding the transportation system to foster safe, inviting and convenient bicycling for commuting, recreation, fitness, and tourism. A bicycle network will be proposed throughout the County and within each of the Towns.

In conjunction with a month-long public comment period, County residents and other stakeholders are invited to a final countywide workshop for the plan. This is the plan's final public workshop before it is presented to the Cecil County Board of Commissioners for adoption. The open house workshop will present the draft document and workshop boards.
