DelDOT’s Approach

- Policy-based Plan
- Wanted to get Stakeholder Involvement
  - Internal
  - External
- Comprehensive in addressing all elements of transportation
How will the Plan be Used?

**DELDOT**
- Inform the CTP Process and Projects
- Guide Policies and Initiatives
- Track Trends and Performance Measures

**PUBLIC**
- Increase Transparency
- Educate & Involve
Internal & External Outreach

AGENCY ENGAGEMENT TECHNIQUES

- Internal Survey
- Collaboration between Divisions to gather information

PUBLIC ENGAGEMENT TECHNIQUES

- Website at www.plandeldot.gov
- Public Survey - 1,100+ surveys
- DelDOT Community Events
- Secretary’s YouTube Video
- MPO TAC & PAC meetings
Goals

- Economic Vitality
- Safety and Security
- Connectivity
- System Preservation
- Quality of Life
- System Management and Operations
- Resiliency and Reliability
- Environmental Stewardship
- Travel and Tourism
- Customer Service and Communication
Transportation Elements

- Planning & Land Use
- Roads, Bridges & Other Assets
- Traffic & System Management
- Bicycle Transportation
- Pedestrian Transportation
- Freight Movement
- Aeronautics
- Public Transit
Transportation Elements Components

- Policy-Based (uses existing strategic plans)
- Challenges & Constraints
- Efficiencies & Innovations
- Assessment of Needs
- Implementation Partnerships
- Strategies & Action Items
- Performance Measures - Baselines & Targets
Main Goals:

- Integrate land use and transportation to maintain and enhance mobility choices and the quality of our communities.

- Collaborate with stakeholders to build support and prioritize investments for developing a multi-modal transportation network and the communities it serves.
Main Goals:

- Provide safe, reliable and functional roadways, structures, drainage facilities and green infrastructure.

- Prioritize, invest and maintain transportation assets to ensure our network is operating effectively and efficiently.
Main Goals:

- Manage movement across the state in a safe, efficient and reliable manner.

- Test, develop, and employ new technologies to make sure our transportation network meets the needs of the traveling public.
Main Goals:

- Advance Delaware’s status as a leader in bicycling and maintain our ranking as the friendliest bicycle state on the east coast.

- Continue making improvements to ensure that bicycling is a safe, reliable and accessible transportation option.
PEDESTRIAN TRANSPORTATION

Main Goals:

- Continue emphasizing pedestrian safety and connectivity as high priorities in our capital project investments.

- Provide safe and barrier-free walkways and road crossings to support and encourage walking as an alternative transportation mode.
Main Goals:

- Provide critical freight movement connections serving Delaware, the Delmarva Peninsula and beyond.

- Improve infrastructure conditions and maintenance of Final Mile freight connections.
Main Goals:

✓ Facilitate the planning, coordination and investment in the public-use airport system.

✓ Maximize the economic benefits of the aviation system while maintaining high safety standards.
Main Goals:

- Manage and operate the highest quality public transit services to meet the needs of our customers and community.

- Expand service to help improve access and opportunities, promote economic growth, and reduce traffic congestion and air pollution.
Current & Evolving Technologies

- Integrated Transportation Management System (ITMS)
- Publicly Available Mapping Resources
- Mobile Applications
- Crowd-Source Information
- Real-Time Conditions Reporting
- Connected Vehicle Technologies
Next Steps

Schedule

FALL 2018

- Internal Stakeholder Outreach
- Strategic Corridors Planning Framework Begun
- Transportation Elements Drafts Compiled

WINTER 2019

- Final Draft Editing
- FHWA Approval
- Draft Published for Public Comment
- Review Comments
- Finalize & Publish Plan
Next Steps

Annual Updates

Update:
- Goals
- Strategies
- Targets
