

Draft Potential Bottleneck Locations WILMAPCO Region

- * NCC scoring based on 6 criteria:
1. Daily Traffic Volumes
 2. Volume/Capacity Ratio
 3. Travel Speeds (% Below posted speed)
 4. Daily Truck %
 5. High Truck generating TAZs
 6. Crashes involving trucks

Notes:

- Cecil crash data not available
- Truck trip generation criteria not applied to interstate routes

Legend/Scoring

- Significant-** Segments with multiple failing criteria. Includes majority of roadways which carry the highest traffic volumes and under heavy congestion pressure.
- Moderate-** Segments that are experiencing some failing (or near failing) criteria. Criteria varies more widely with some showing failure and some at more modest levels.
- Minor-** Segments experiencing one or more criteria that are near failing. Most have only a few criteria near failure while others are at acceptable levels.

Scoring based on the average score achieved by calculating the total points divided by the applicable criteria.
